

QINEO-TT-HG-200

**TIG-Handsweißbrenner, gasgekühlt, bis maximal 150 A
Schweißstrom**

The light and handy TIG manual welding torch QN-TT-HG-200 is designed for a welding current of up to 200 amperes. The ergonomic handle lies perfectly in the hand and enables fatigue-free and precise welding. Stable and high-quality components ensure maximum process reliability and optimum welding results. We supply all TIG manual welding torches with individual connections and different cable assembly lengths. We integrate remote control and operating elements as required. Contact us and get your individual TIG welding torch as you need it for your application.

- Ergonomic handle: Optimum handling and a minimised strain on wrists
- Stable components: Maximum service life
- Optimum quality: Optimum welding results in all welding positions
