CLOOS

Weld your way.

Stand: August 2022

Confirmation on REACH Regulation 1907/2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals.

As a manufacturer of welding equipment and products, Carl Cloos Schweisstechnik is a "downstream user" within the meaning of the REACH Regulation.

Since our products are articles in the sense of the REACH regulation and are not defined as substances or preparations and, moreover, our products do not release any substance under normal and foreseeable conditions of use, Carl Cloos Schweisstechnik is neither subject to the obligation to register nor to the obligation to prepare safety data sheets.

Our suppliers are legally obliged to inform us without being asked if the products they supply contain a substance of very high concern (SVHC) above the permissible limit values. If we receive such information from our suppliers and thereby become aware that our products also exceed the limit value for a SVHC substance, we will inform you promptly.
