

## Management change at CLOOS in North America

# **Doug Zoller takes over leadership at CLOOS Robotic Welding**

HAIGER/SCHAUMBURG, June 2022 - Doug Zoller took over the management of CLOOS Robotic Welding Inc. in the USA and Mexico at the end of June. He replaces Hartmut Boegel, who is retiring from the company on 30 June after more than 40 years of service.

"Hartmut Bögel has shaped the successful development of our subsidiaries in the USA and Mexico over the past 25 years," says Stephan Pittner, CEO of the CLOOS Group. "We would like to express our heartfelt thanks to him for his professional expertise and commitment."

CLOOS Robotic Welding Inc. was founded in 1985 as a subsidiary of the CLOOS Group. From locations in Schaumburg, Illinois and Monterrey, Mexico, CLOOS Robotic Welding offers customer-specific, turnkey welding solutions for the US and Mexican markets.

"CLOOS has a unique product portfolio and the demand for innovative solutions in the welding and automation sector is enormous," says the new General Manager Doug Zoller. "My goal is to work with the highly motivated CLOOS team to gain further market share in the USA and Mexico and to exceed our customers' expectations." The welding engineer and MBA has extensive know-how in the fields of welding and automation technology as well as many years of leadership experience in the areas of technology, project management and sales. Most recently, he held various senior positions at welding equipment manufacturer ESAB.

"With his experience, Doug Zoller will optimally support us in achieving our growth targets in the North American market," emphasises Alexander Veidt, CFO of the CLOOS Group. "We look forward to a successful cooperation and wish Doug Zoller a good start and much success in his new position."

**CLOOS Welding technology:  
Robot and welding technology from a single source**

Since 1919, Carl Cloos Schweisstechnik GmbH has been one of the leading companies in welding technology. More than 900 employees all over the world realize production solutions in welding and robot technology for industries such as construction machinery, railway vehicles, automotive and agricultural industry. The modern CLOOS welding power sources of the QINEO series are available for a multitude of welding processes. With the QIROX robots, positioners and special purpose machines CLOOS develops and manufactures automated welding systems meeting the specific requirements of the customers. The special strength of CLOOS is the widely spread competence. Because – from the welding technology, robot mechanics and controller to positioners, software and sensors – CLOOS supplies everything from a single source. In addition to its headquarters in Haiger, CLOOS has nine production sites, 14 subsidiaries and 64 sales and service points around the world.
